Innovation challenge	in Social Innovation
Tech meet up	Assisted organising of tech meetup at Edge Hill University

Educational History

Robert Napier School

June 2014 – July 2015

Applied Science	A level	C	July 2015
ICT	OCR level 3 Cambridge Technical	Distinction	July 2015
Maths	G.C.S. E	B	June 2013
English	G.C.S.E	C	June 2013
Science	G.C.S. E	B	June 2013

Employment History

Edge Hill University, Computer Science Department

Sep 2016 - Current Date

Student Mentor

My responsibilities in this role were to be the first point of contact for students studying computer science in their first year. I would support them in both academic and pastoral care for example with their understanding of how code works and if a student was struggling with being away from home for the first time.

Classroom Assistant

My responsibilities were to support the lecturers during the first year web lessons. This involved solving problems with student's code and finding and rectifying mistakes within the tutorial for the whole year group. This experience has allowed me to improve my skills in searching for broken code within the HTML, CSS and JavaScript. While dealing with students of different technical abilities I have developed a variety of techniques and methods to support students effectively in a calm, positive way. In relation to this it will allow me to speak to clients in a clear and professional manner. Currently I am now teaching second year students Laravel which will enable them to understand how to develop within a PHP framework.

Hobbies and Interests

During my holidays I am an active member of my local church, which includes helping with fundraising, workshops and promoting the church through Social Media to the wider community. I have used my IT skills to create and continue updating the Facebook Page and support the designing of the Website.

To refocus I relax by watching Marvel TV shows and a wide genre of TV series. I also enjoy watching a variety of sports including Rugby, Football and Formula 1.
